Offset Motor for Counter-balanced starting - No Kickback

PV25

C25

C27

Exceptional balance through offset motor countering startup torque. Eliminates the risk of startup surface 'burn' and reduces operator fatigue.

Height adjustable handle with ergonomic design

Combined with offset motor for excellent balance, the fully height adjustable handle with safety triggers and contoured handles makes them amazing machines to use. We use ergonomic design suggestions to make the handle easy and comfortable for efficient use.
